

H M POWERBOATS
LUXURY & PERFORMANCE

mys
MONACO YACHT SHOW

CUSTOM MADE

BRITISH BUILT

At HM Powerboats we design and craft bespoke, luxury vessels, which lead the way. Your powerboat will be built to the highest specification and, from the waterline up, incorporate all your specific requirements for an extraordinary level of personalisation.

Each superyacht tender is individually made by us in Southampton, UK, collaborating closely with you or your architect.

A remarkable ride behind the elegance

Every design is elevated by our exclusive, non-stepped, deep-V hull, which cuts impressively through the waves. Created by renowned powercraft hull designer, Adam Younger, this is British engineering at its finest, delivering a sure-footed ride compared with stepped designs, without compromising on performance.

With HM Powerboats, you have the speed, stability and handling of an offshore craft and the elegance, luxury and comfort of a bespoke vessel.

Where luxury meets performance

Advanced technology, combined with the exclusively designed non-stepped deep-V hull, provide the ride to make every moment enjoyable. Our boats are designed to give you the freedom of power and control and deliver an astonishingly comfortable and safe transit, even in offshore conditions.

SUPERYACHT TENDERS

8.5M:11M

Our fully customisable range of RIBs starts with the HM 8.5m and extend upwards to 11m. Developed for leisure and activity, this prestigious craft is ideal as a complementary transit vessel or for water sports.

With the highest specification assured, you can focus on personalising the smallest of details for the ultimate, superyacht tender experience.

“HM Powerboats might just be the coolest RIB builder you’ve never heard of.”

Jack Staines, Motorboat and Yachting Magazine.

“These RIBs are pretty much unbeatable.”

Motorboat & Yachting Magazine.

“This is the most admired RIB we have ever owned. So much so that we have actually purchased two, a 7.7m for the UK and an 8.5m for the Caribbean.”

Richard, St. Lucia.
